Red Hat | SAP Platinum Partner

Build a foundation for success
10 reasons to run SAP S/4HANA on Red Hat Enterprise Linux for SAP Solutions

Your business relies on your SAP® environment for critical processes and data.

Choose an infrastructure platform that lets you optimize your SAP environment and operations while preparing you for the future. Through trusted technologies, investment protection, and flexible innovation, Red Hat can help you modernize your SAP systems and build a foundation for digital transformation.

Trusted technologies

1 Choose a vendor that leading enterprise organizations trust.
MORE THAN 90% of companies in the Fortune 500 rely on Red Hat® products.[1]

2 Protect your business with advanced, built-in security.

| Layered protection | Controlled supply chain | Automated tools | Integrated data encryption | Common Criteria & FIPS[2] certification |

3 Keep your SAP environment running with world-class support.

Global, collaborative, integrated support
Faster resolution and fewer hassles

MORE THAN 25 years of experience in full-stack operations

Investment protection

4 Reduce risk with a standard, community-accepted product.

Red Hat Enterprise Linux® for SAP Solutions is based on the general Red Hat Enterprise Linux release and inherits its **reliability, quality assurance, and certifications**.

5 Select a validated, certified, and jointly engineered foundation.

Red Hat Enterprise Linux for SAP Solutions is tested and certified for SAP S/4HANA® and includes SAP-specific features and content.

| High availability failover orchestration | Red Hat Insights — Predictive risk analytics and guidance | Up to 4 years of minor release updates[3] | Red Hat Satellite — Infrastructure management tools | SAP-specific packages and content |

6 Boost performance with an optimized platform.

#1 Red Hat Enterprise Linux holds **world records** for SAP BW Edition of SAP HANA V3 in total data load and transformation runtime, total complex query phase runtime, and query executions per hour.[4]

### 7 Prepare for the future with a vibrant developer ecosystem.

Red Hat fosters a large developer ecosystem and programs to help developers learn the skills and tools they need to be successful.

Flexible innovation

8 Build an extensible infrastructure that spans your organization.

Standardize on the same platforms and tools for your SAP and general IT environments with a complete, consistent software stack.
9 Lay a foundation for innovation.

Customize your environment and innovate more easily with complementary products from SAP, Red Hat, and certified partners.

| Automate | Connect | Integrate | Expand | Embed |

10 Gain more choice and flexibility.

Red Hat Enterprise Linux supports the technologies you need to prepare for digital transformation.

| Virtualization platform choice | Multiple cloud service providers | Support for containers | Internet of Things (IoT) solutions |

Maximize the value of your SAP environment with Red Hat.
